EN

## Suction and delivery of food products

**Standards:** Reg. EC 1935/04 and EC 2023/06. Phthalates free. PAHs free (acc. to ZEK 01.4-08 Cat. 1). Bisphenol A free. Heavy metal tested. FDA tit.21 art.177.2600 aqueous foods. BfR XXI Cat.2 foods.

**Application:** hardwall hose for suction and delivery of many food products as milk and dairy products, fruit juice, beer, wine and others alcohols up to 96%, with exception of fatty foods and oils. Suitable for hot air on tank truck up to 140°C.

**Temperature:** from -40°C (-40°F) to +120°C (248°F).

### Construction

**Tube:** white, smooth, food quality EPDM, taste free and odorless.

**Reinforcement:** high strength synthetic cord and helix wire.

**Cover:** blue, smooth (wrapped finish) synthetic rubber, abrasion and weathering resistant.

**Branding:** continuous orange/silver stripe "IVG Food (family logo)...".

**Also available upon request:** 1. Different diameters. 2. Softwall hose version.

RU

## напорно-всасывающий рукав для пищевых продуктов.

**Нормативы:** Пер. CE 1935/04 и CE 2023/06. Без фталатов. Без IPA (соотв. ZEK 01.4-08 Cat. 1). Не содержит бисфенола А. Тестирован на тяжелые металлы. FDA tit.21 art.177.2600 жидкие пищевые. BfR XXI Cat.2 пищевые.

**Применение:** гладкий напорно-всасывающий рукав со спиралью для пищевых продуктов: молока (молочные продукты), соков, пива, вина и других алкогольных напитков до 96%, за исключением жирных продуктов. Подходит для горячей воды до 140°C грузовых цистернах.

**Температура:** от -40°C до +120°C.

### Конструкция

**Внутренний слой:** белый пищевой ЭПДМ, без вкуса и запаха.

**Усиление:** высокопрочный синтетический текстиль со встроенной стальной спиралью.

**Покрытие:** синее, гладкое (с оттиском текстильного бандажа), синтетический каучук устойчивый к истиранию, и атмосферным воздействиям.

**Маркировка:** оранжево-золотая маркировка "IVG Food (logo application)...".

**В наличии по запросу:** 1. Разные диаметры. 2. Версия без спирали.

**Advice to users**  
on hoses in contact with food

## » Clean In Place information

- IVG recommends for the first use a wash cycle with potable water at a maximum temperature of 80°C/90°C and a hose sanitation as reported above before conveying food products.
- At the end of each cycle the equipment and hose assemblies must be cleaned and disinfected.
- Strictly follow the times indicated for each cleaning cycle.
- Do not immerse hose assembly in the sanitation fluid because only the inner tube is suitable for contact with the below mentioned solvents.
- Every cleaning cycle must be immediately followed by a complete rinse.
- Do not exceed 3 bar working pressure in CIP systems.

## » Clean In Place information

- Al primo utilizzo, IVG raccomanda di effettuare un ciclo di lavaggio con acqua potabile alla temperatura di 80°C/90°C e una sanificazione della manichetta prima di convogliare i prodotti alimentari.
- Al termine di ogni ciclo di utilizzo deve essere effettuata la detersione e la disinfezione delle manichette.
- Il rispetto dei tempi è fondamentale per ogni ciclo di lavaggio.
- Non immergere la manichetta nel liquido di sanificazione poiché solo il sottostrato è idoneo al contatto con i solventi indicati.
- Ogni ciclo di lavaggio deve essere immediatamente seguito da un risciacquo completo.
- Non utilizzare sistemi CIP oltre 3 bar di pressione.

\* Le indicazioni riguardanti i tubi di questa lista fanno riferimento ai codici prodotto presenti nel catalogo IVG [www.ivgspa.it](http://www.ivgspa.it).

## General Advice

- Hoses are not meant to permanently contain the products they convey.
  - Store hoses away from direct sunlight and heat. When not in use store hoses with perforated plugs at both ends.
  - Before every use check the hose condition. The hose cover, especially in the fitting area, should show no signs of cuts, tears, or bubbles. There should be no hard or weak areas, signs of detachment or collapse.
  - Remember to guarantee traceability of every single piece of hose put into the market (CE 1935/2004, CE 2023/2006)
- 
- I tubi non sono idonei alla stagnazione permanente dei prodotti.
  - Stocca al riparo dalla luce e dal calore, con tappi forati alle estremità.
  - Verifica sempre le buone condizioni del tubo prima di ogni utilizzo (nessuna rottura, taglio, rigonfiamento, area irrigidita a molle, distacco, collasso) specialmente nell'area dei raccordi.
  - Ricorda di garantire la rintracciabilità di ogni singola pezzatura di tubo immessa nel mercato (CE 1935/2004, CE 2023/2006).

## SAFETY INFORMATION – USER RESPONSIBILITIES

The service life of rubber hoses mainly depends on the dedicated use. Equipment and systems where the hose is installed must be designed safely. Since our hose can be designed for different applications, IVG Colbachini SpA cannot guarantee the proper functioning of the product for all situations. The analysis of the technical aspects related to specific uses must be performed by the users when choosing the product that meets their requirements. So, in relation to the variety of operating conditions and applications of the IVG hose, the user is solely responsible for the final choice of the product deemed suitable to satisfy the performance and safety requirements called for the application.

The information and technical data shown in the product data sheets must be examined by users with appropriate technical skills.

IVG Colbachini is not responsible for other uses, identified by the end user, that are different from the one shown in its catalogues, product sheets, offers, order confirmations and any recommendations attached.

An inappropriate choice of the product or a failure to follow the procedures of installation, use, maintenance and storage of the hoses may lead to a hose break and cause material damage and/or serious injury to people.

For the selection and proper use of the IVG products you can also refer to the document "Recommendations for selection, storage, use and maintenance of rubber hoses" provided by Assogomma and available on [www.ivgspa.it](http://www.ivgspa.it).

These recommendations are according to the international standard ISO 8331, "Plastic and rubber hoses and hose assemblies - Guidelines for selection, storage, use and maintenance."

**For safety reasons, never exceed the working pressure indicated in the product data sheet.**

For specific applications of rubber hoses, please refer to the legal requirements or specific standards; moreover additional recommendations for particularly critical applications are available.

For further information, contact the Marketing department ([marketing@ivgspa.it](mailto:marketing@ivgspa.it)).
